RS School | JavaScript/Front-end

September 2022 - March 2023 | Almaty, Kazakhstan

Belarusian State Academy of Communications

September 2007 - June 2014 | Minsk, Belarus

Telecommunications engineer

SUMMARY

You can see my hard skills in my [portfolio](#), [github](#) and [codewars account](#). Here are a few facts that I think are the most revealing:

I graduated from RS School | JavaScript/Front-end in 35th place out of ~11,500 registered users, starting from scratch. I graduated from RS School | React in 1st place out of ~550 students. This does not characterize my code, but characterizes my purposefulness

I was a team leader in all school team tasks. Each of these works fell into the list of the best works of the course. I can work in a team and organize people

I have many different experiences. This wording may sound a little wrong, but the essence is accurate. I have worked for a large company, for a small company, and I have been a store owner. It does not help to write code, but it helps to formulate the task, decompose it into parts, determine the order of their execution, etc.

PROFESSIONAL EXPERIENCE

DAR-electro - Minsk, Belarus

February 2019 - March 2022

Founder Assistant

Work with a representative office | Market analysis | Meetings | Selection of equipment
